# RECLAIMED ASPHALT PAVEMENT

## 再生瀝青

Reclaimed asphalt pavement (RAP) is generated when asphalt pavements are removed for reconstruction or resurfacing.

Our asphalt plant in Sheung Shui is equipped with a sophisticated crushing facility to crush and screen the RAP. The materials recovered are used as a replacement of the virgin materials in asphalt manufacturing process, which supports the recycling practices promoted by the Environmental Protection Department.

再生瀝青(RAP)是指在既有瀝青路面挖掘或刨除出來的物料，經處理後可循環再用。

嘉華瀝青位於上水的廠房配備先進的破碎設備，可將回收的再生瀝青進行破碎及篩分，代替原材料用作瀝青生產，支持環保署的減廢回收推廣計劃。

**“ Construction waste is collected locally, reprocessed locally and reused locally.  
收集本地建築廢料，本地處理，本地再用。 ”**
